PROFILE

I combine frontend architecture, AI workflows, prompt engineering, CMS websites, payment integrations and production-ready automation. Targeting instant-feeling load times, 100/100 Lighthouse scores and conversion-focused user experiences.

15+ websites shipped. Commercial, SaaS and AI-powered products. **Languages:** EN / UA / RU.

WORK EXPERIENCE

QClay

Lead Prompter, Frontend Developer & AI Engineer

Apr 2026 - Present

Remote

- Build premium websites, interfaces and interactive effects with React, Next.js, TypeScript, Tailwind, SCSS, WebGL and Three.js.
- Create high-quality prompts for Lovable, Claude Code and other AI builders, including reusable prompts for complete websites and luxury visual effects.
- Develop AI-assisted workflows, integrate APIs and optimize for near-instant load times, 100/100 Lighthouse targets and stronger user engagement.

Lafys

Lead Prompter, Frontend Developer & AI Engineer

Apr 2026 - Present

Remote

- Contribute to the full product lifecycle of Lafys - a curated library of design-grade prompts for Lovable, Claude and v0.
- Develop and maintain the product website with Next.js, Sanity.io and TypeScript.
- Turn design expertise into tested prompts that help founders and designers ship polished, conversion-focused websites with AI.

Jiraffy Marketplace

Frontend Developer

Nov 2025 - Apr 2026

Remote

- Built product listings, filters, search UI and checkout flows with React, Tailwind CSS and SCSS.
- Improved Lighthouse Performance from ~60 to 90+ and refactored 10+ components to reduce re-renders and layout shifts.
- Integrated REST APIs across a team of four via GitHub branches, code reviews and pull requests.

AI PROJECTS

INDEPENDENT

Business AI Agent & Website Assistant

Configurable AI agents for websites using RAG, embeddings, vector databases, OpenRouter, Claude API and OpenAI API.

INDEPENDENT

Configurable 18+ Conversational AI

Deeply configurable conversational chatbot with custom behavior instructions and user experience controls.

INDEPENDENT

Graph-Based AI System

AI product with graph-based logic for structured reasoning, customizable workflows and deep behavioral configuration.

INDEPENDENT AI PRODUCTS

AuraSynk, Velluma.ai & GONEV

AI products and Telegram bots with custom assistants, business instructions and AI-driven user journeys.

TECHNICAL SKILLS

FRONTEND

React Next.js TypeScript JavaScript HTML5 CSS3 SCSS Tailwind CSS Framer Motion Responsive Design

CREATIVE DEV

WebGL Three.js Interactive Effects Motion Design Figma Pixel-accurate Implementation

AI ENGINEERING

OpenRouter Claude API OpenAI API Telegram Bot API RAG Embeddings Vector DBs AI Agents Prompt Engineering

AI TRAINING

Unsloth.ai JAX Keras Kaktus Fine-tuning Model Adaptation

BACKEND & DATA

Supabase SQL REST APIs Sanity.io GROQ CMS Architecture

PAYMENTS

Shopify Lemon Squeezy Epoch E-commerce Flows

TOOLS

Claude Code Lovable GitHub Git Vercel VS Code Cursor CI/CD

AI ENGINEERING FOCUS

I design the complete path from an idea or visual reference to a production-ready AI product: prompt architecture, model provider selection, retrieval and knowledge flows, agent instructions, website integration, Telegram bots, custom assistants, frontend delivery and iterative improvement. I also package complete websites, components and visual interactions into high-quality prompts for AI builders.

EDUCATION

Frontend Development Program Sep 2025 - Present

Advanced practice in React, Next.js, TypeScript, responsive UI, accessibility, architecture, API integration, Sanity CMS, animation and collaborative Git workflows.
